

## SketchDungeon

And now for something a little different...Remember playing old school rpg games on graph paper?

Now you can watch those sketches come to life!SketchDungeon is a top-down dungeon exploration action game. You will encounter orcs, goblins, ogres and more as you sight your way beeper and deeper into the dungeon.

SketchDungeon uses a high-performance 2d physics engine that enables rich gameplay and keeps an amazing number of active creatures on the screen at the same time.- Fight through 15 handcrafted levels of old school dungeon mayhem

- Real-time physics engine
- Unique Hand-drawn Sketch Animations
- Control your hero with the Accelerometer
- Tap to shoot where you want
- Strafing - Move one way, shoot another
- Utilize powerups - exploding arrows, banking shots, and more
- Zoom in and out while playing
- Particle explosions
- On-line high score leaderboard

\*-Fast OpenGL ES Rendering enables fluid animation and great gameplay

User's Comments: "Great gameSketch Dungeon is a blast. It looks like no other game I've seen out there. Easy to learn and keeps you interested the whole way through. Love the tilt action. I can't wait to show my kid. Great job, Shmoopie!"  
"Great "Casual Distraction" game While the game does not have the most cutting edge graphics it suits casual gaming perfectly. It's perfect for short bus rides and long lines. Can't wait to see more from this dev. I really like the fact that they added the high score board too."
