

Warpack Grunts

Infamous cheapskate and generally naughty person Evil Dude is forming an army of Ubiquitous Badly Trained Evil Chaps for his latest plan of world domination, led by his henchman General Issimo. An international squad of special forces troopers pulled from units all around the world has been put together. They shoot things, blow things up, drive tanks and pilot helicopters. They also really, really love their M-16s. They are the Grunts! Lead the squad around 40 levels of mayhem to stop Evil Dude's plan and save the world. Warpack: Grunts has 4 levels of difficulty (Easy, Normal, Hard and Nnnnaarrgh!), online highscores for the campaign and every level, as well as a special unlockable game mode for those of a survivalist nature (oh and the obligatory hidden musical instrument of course). User's Comments: "Rock Solid Fun This game totally delivers! Graphics & controls are top notch, but it's the sounds & comical storyline that make it so fun. Great to see a game like this that doesn't take itself so seriously. Gameplay quickly becomes challenging though the level/objectives are rather short - not that I've made it through the game yet. Worth the money hands down!"

"A classic Warpack grunts is an amusing and sometimes witty game that is very fun to play. The missions are neat and can keep you on your toes. The Grunts voices can sometimes be very funny which just adds to the charm of this great game. For a dollar you really can't go wrong. It's gameplay can easily match and sometimes surpass many of the more pricey games. My only complaint is that the controls get some getting used to, but other than that this game is a steal for the cost. "
