User's Comments: "modern Combat: AWESOME AWESOME AWESOME This game is really good. I have been looking forward to this for a while. Easily the best FPS for iPhone. The multiple control schemes give users more options. Not to mention the graphics are a HUGE step up from the last one of its kind gameloft, brothers in arms, which was good. I love this game. If you can stand the price, it's a must buy." "Bad azzzzz Thank you so much for finally getting it out. Very good game. Forget all the rest this is the game to get.
