User's Comments: "Great fighting game. Period. If you like games like Soul Calibur and Tekken, you will have a lot of fun with Blades of Fury -- after you retrieve your jaw from the floor, that is. Stunning graphics, near perfect controls, a wide variety of characters with unique fighting styles, fully animated environments, five difficulty levels, and a great frame-rate even on older generation devices: what it lacks in originality it makes up in serious execution." "Incredible! I haven't picked up a fighting game for a while under the new consoles, and I'm so glad to have found this game now! Simple and responsive controls, yet it also incorporates great fun with its overall functionality. Definitely one of the best games I've purchased since I got my first iPhone in 2007. And I buy a game each week so that says a lot. Gameloft rocks!"
