User's Comments: "By far the funnest game for the iPhone yet!Gangstar is easily describes as the funnest iPhone game made yet! Though from screenshots the may look difficult, it is one of the easiest gameplay expierences ihave noticed yet. While most games such as this are asking for \$9.99, Gangstar is only asking for the low price of \$6.99, basically making it a steal! Buy this game today and see all of this for yourself!"Just get this game...Played for bit and my only complaint was that the battery on my ipod died. To all my GTA fans and anyone who enjoys a good game at a good price. Just get this game. Thank you Gameloft. Can't wait for an update to this sweet piece of work, maybe online multiplayer."
