Activate Nitro Boost and Speedbreaker with the swipe of your finger WHITE HOT ROCK

From heavy metal makers Airbourne, or your own iTunes library EARN PERFORMANCE UPGRADES

Like Boost, Speed, Acceleration and Handling for even greater velocity

User's Comments: "By Far The Best Real Racing App On iTunes This is by far the best racing game. The graphics, as many others have mentioned, are gorgeous. The gameplay is very simple. Unlike other racing apps, NFSU does not have a million buttons cluttering up the screen. Nitro is engaged by an upward swipe, speedbreaker is by a downward swipe. Pause is a two-fingered wipe downward. All of these actions can be done anywhere, anytime. This is one of my most used apps on my iPod Touch **update** a lot easier to load up now that the game has been updated to fit the 3.0 software. No more need to reboot every time I want to play the game."

"WOW can't stop playing-update This is certainly not the first racing app I have gotten and paid good money for, and this is no doubt the best one yet and probably for a long time. If any app is deserving of a 10 dollar price tag it is this one!! Completed the game and find myself wishing for an update with a new map and new cars. I cannot play it until there is something new"
