- * Advanced AI with 4 difficulty levels to challenge all users

* 17 weapons and defensive systems: select your equipment to match your strategy for victory! User's

Comments: "Perfect (almost) This app is absolutely amazing. It has perfect polished graphics, awesome customization, and some awesome physics. It's like iShoot and Pocket Tanks, which is awesome by the way, all rolled into one. Only problem is the lack of weapon choices but that is made up with the sheer perfection of everything else. All in all, a near perfect game."

"Great game This game is like the evolution of iShoot. The graphics are above iShoot in every way. The menus are better. And best of all, it has online play of up to 6 players. Developer already said that updates are coming so i'm sure it'll catch up in the two areas were it' still inferior to iShoot: amount of weapons and wind factor. Also, the music could be a little less repetitive and if they integrate the ability to select music from your collection it would be better."
